

V-Score

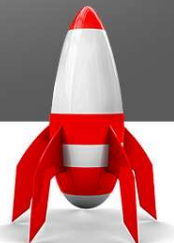

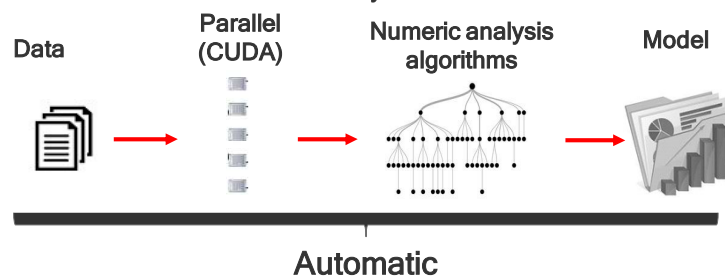

V-score is a software tool for quick and easy scoring

V-Score Team, 2019

Deal

- V-score team offers fully automatic scoring process:
- 1) You upload data to a cloud service.
 - 2) Intelligent algorithm prepares the most accurate scoring model using the latest technologies in parallel computing and data analysis.

V-Score Team, 2019

Market

Today, the credit market in Europe exceeds \$900 billions.

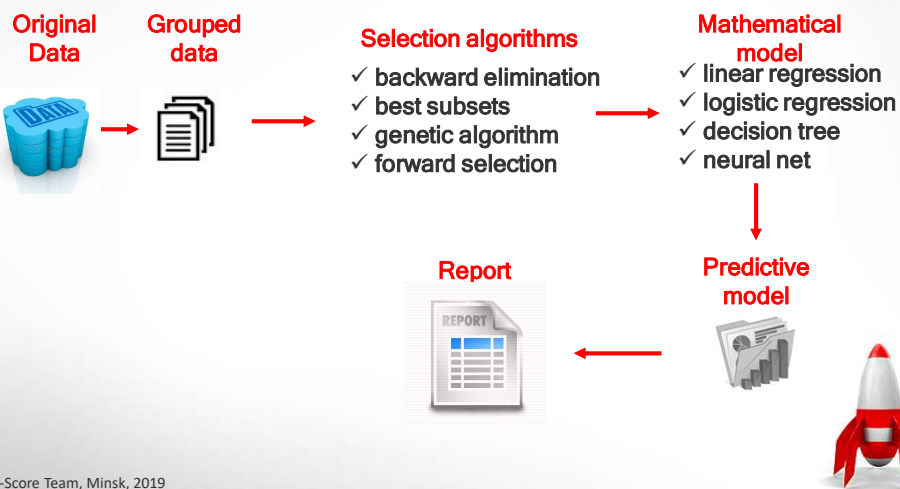

In Europe and USA there are some automatic scoring software tools, but they are too expensive. In Russia and Eastern Europe there are not enough such tools and they have limited functionality only .

V-Score Team, 2019

Value proposition

Our main customers are banks and investment funds

Product prototype

V-Score

 Model  Algorithm  Report  Monitoring  Users

- backward elimination
- best subsets
- genetic algorithm
- forward selection

V-Score Team, Minsk, 2019

Financials

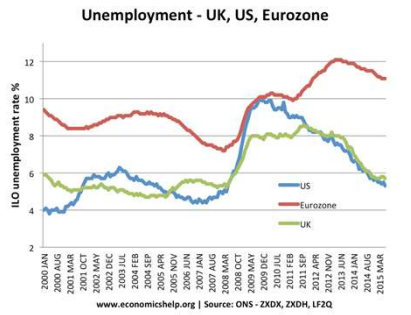

Indicator	1 st year	2 nd year
Annual subscription, 1 user	25	100
Lifetime license of current version, 1 user	5	20
Total profit, Euro	27500	110000
Profit from annual subscription, Euro	17500	70000
Profit from lifetime license, Euro	10000	40000

Annual subscription price – 700 Euro
Lifetime license price – 2000 Euro

V-Score Team, Minsk, 2019

Social impact

No unreliable credits - No global financial crises as it was in 2008

Our advantages

Time

short time frame for model development

Quality

intelligent algorithms of analysis

Price

Our price is relatively small

Flexibility

settings for each step of model development

Thank you!
